

First Central State Bank

Online Banking User Requirements

Connectivity, user hardware, browser support, and integration are critical to providing the best user experience to online account holders. We work hard to make sure First Central State Bank online banking renders properly and securely on the most popular systems. Below is a summary of recommended hardware, browsers, and accounting software we have tested and support.

Recommended Minimum User Hardware and Connection

- Standard PC or Mac® with at least a 1-GHz processor and 1 GB of RAM.
- Available browser updates applied for improved security that provide anti-virus and spyware protection.
- Microsoft® Windows® Vista Service Pack (SP) 2 and 3, Microsoft Windows 7/8/10, or Mac OS X.
Note: Microsoft stopped supporting Windows XP and XP-compatible Internet Explorer (IE) in April 2014, including security updates. XP users who do not upgrade their operating systems should replace IE with Google Chrome™ for an up-to-date, secure internet browser.
- Cable, Digital Subscriber Line (DSL), or Integrated Services for Digital Network (ISDN) Internet connection. (Dial-up connections are not supported.)

Note: Satellite connections often have difficulty supporting encrypted, Hypertext Transfer Protocol Secure (HTTPS) applications. Since First Central State Bank online is HTTPS-encrypted for the safety of your financial information, some satellite cable connections may exhibit slow responses.

Supported Browsers by Operating System

Microsoft Edge – all versions
Mozilla Firefox – version 32 and higher
Google Chrome – version 36 and higher
Apple Safari -
Desktop Safari: version 6 and higher for OS X 10.9 (Mavericks) and higher (7)
Mobile Safari: version 6 and higher for iOS 5 and higher

Note: Browsers are subject to change. Information current as of August 2019.
